Who Are the Angels?

Angles are messengers of God who are here to help us in our daily lives. They are a part of the divine mind of God and because of the absence of an ego they are able to help us unconditionally and compassionately non stop with perfect love. Their guidance is full of compassion and spiritual truth.

Guardian Angels

Guardian Angels are with us all of the time; in fact there are some who are appointed at the moment of our incarnation into a physical body and stay with us throughout our ascension process. This means as we grow and change the beings that guide us grow and change with us or an angel that is more suited for the life phase or the lesson that we are currently experiencing become a part of our life mission. These angels are here to help us with every aspect of our lives; we can call on them and speak with them at anytime. In reality they encourage normal conversations whether out loud or mentally in order to strengthen our communication and relationships with them. We are never alone. Even when we don't take their advice they patiently wait for us to ask for help and listen. So remember everyone has a guardian angel.

Guardian angels:

- Are not deceased loved ones
- Are beings of light
- Support us constantly
- Everyone has at least two
- Will assist us with what we need as long as we ask for the help

Earth Angels

Earth angels are beings of light that currently or at one time had a physical body. This incarnation created an ego, which like most of us harbor thoughts and beliefs that are separate from our creator. It is important to note that the presence of an ego does not keep them from helping us in our daily lives. It just means that there are earthly lessons for them to learn, as well. Below are additional examples of earth angels.

- Fairies (Elemental Realm)
- Power Animals
- Totem Animals
- Friends and Loved Ones (Who show up exactly, when we need them)

- Healers

Archangels

As mentioned Archangels are beings of light who are sent as messengers of the Divine source of love that we all emanate from they are not separate from us or our Source, but they do hold unconditional love and service to the light and all of life. Calling upon angels ensures clear accurate messages and guidance that focus on your highest good and potential only. They will not and do not relate to us from a place of separation, but they do operate from the universal law of free will, so if we do not ask for their guidance or refuse their help they will not interfere. They do on occasion warn or protect us of immediate danger, but even then it is up to us to follow the guidance and information that has been provided.

It is important to remember that angels do not have bodies they at times project themselves into physical form to allow us to relate to them. However, they are pure light; a thought of pure unconditional love.

Divine Guidance

Divine guidance is exactly what it says: guidance from the Divine, we often rely on our physical and intellectual senses to guide us in our daily lives or to make important decisions. While these senses are important there is a source that many of us do not use, which is the all knowing source. God and the Angels can guide us but many times we feel unworthy of their help.

Divine guidance is an art ,there is not a clearly defined method or technique of communicating with the non-physical world. There are many books and discussion on the subject, what is most important to remember that your essence has a unique way communicating. Which means the Universe will communicate with us in ways that we will understand on a personal level. In addition, your ability to receive and understand Divine wisdom increases as you continue to clear any blocks to receiving information. The most common and important ways to increase your gift is through a daily spiritual practice, trust and an open mind.

The Four Clairs

The “Four Clairs” describe the four primary ways of receiving guidance from our higher selves and the angels, each form of communication is available to everyone, however depending on our missions some are more developed or utilized more then others.
